# Symantec™ Multi-tier Protection Small Business Edition

Trusted protection from malware and email-borne threats

## Overview

Symantec™ Multi-tier Protection Small Business Edition is a simple, easy-to-use, and cost-effective solution designed to safeguard business assets through Symantec's trusted protection against malware, viruses, and spam. It provides unmatched defense for laptops, desktops, and servers, and it protects Microsoft® Exchange servers against email-borne threats and security risks.

### Endpoint protection

Symantec Endpoint Protection delivers more than world-class, industry-leading antivirus and antispyware signature-based protection. It also provides advanced threat prevention that protects endpoints from targeted attacks and attacks not seen before. It includes turnkey, proactive technologies that automatically analyze application behaviors and network communications to detect and block suspicious activities, as well as administrative control features that allow you to deny specific device and application activities deemed as high risk for your organization—you can even block specific actions based on the location of the user. This multilayered approach significantly lowers risks and gives you the confidence that your confidential information and business assets are protected. Whether the attack is coming from a malicious insider or is externally motivated, endpoints will be protected.

### Mail protection

Symantec™ Mail Security provides high-performance, integrated mail protection against virus threats, spam, and security risks while enforcing internal policies on Microsoft

Exchange servers. Symantec Brightmail™ based Premium AntiSpam subscription is included to provide best-of-breed spam prevention without additional ongoing administration after initial setup.

Symantec also offers a range of consulting, technical education, and support services to guide you through the migration, deployment, and management of Symantec Endpoint Protection Small Business Edition and help you realize the full value of your investment. Essential Support Services provide confidence that your critical assets are supported around the clock, and for customers requiring onsite design and implementation services, Symantec™ Consulting Services has several offerings available.

## Key benefits

### Secure

**Multilayered defense**—Includes the integrated Symantec Endpoint Protection solution for Microsoft Windows® operating systems, Symantec Premium AntiSpam, and Symantec Mail Security for Microsoft Exchange servers. This combination provides heightened protection against the evolving threat landscape, and it protects against email-borne viruses, spam, and security risks in a turnkey package.

**Comprehensive protection**—Integrates best-of-breed technologies to stop security threats—even from the most devious new and unknown attackers—before they penetrate the network; detects and blocks malicious software in real time, including viruses, spam, worms, Trojan horses, bots, spyware, adware, and rootkits.

Confidence in a connected world.    symantec™

**Proactive protection**—Symantec TruScan™ Proactive Threat Scan uses a unique Symantec technology to score both good and bad behaviors of unknown applications, enhancing detection and reducing false positives without the need to create rules-based configurations.

**Industry-best threat landscape intelligence**—Symantec protection mechanisms use the industry-leading Symantec™ Global Intelligence Network to deliver an unparalleled view of the entire Internet threat landscape. This intelligence results in actionable protection and peace of mind against evolving attacks.

### Simple

**Easy to install, configure, and manage**—Symantec Endpoint Protection makes it easy to enable, disable, and configure desired technologies to fit into your environment.

### Seamless

**Symantec™ Network Access Control ready**—Each endpoint becomes "Symantec Network Access Control ready," eliminating the need to deploy additional network access control endpoint agent software.

**Integration with Altiris endpoint management solutions**—Makes it easier to distribute software packages, migrate older Symantec AntiVirus™ or other antivirus deployments, and view new agent rollout status and activity.

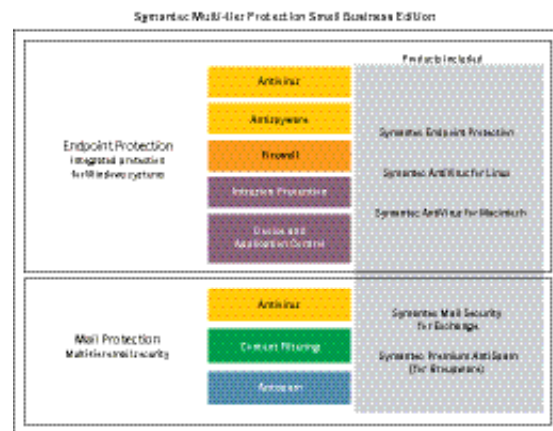

### Key features

#### *More than antivirus*

**Antivirus and antispyware**—Symantec Endpoint Protection provides best-of-breed malware protection, including market-leading antivirus protection, enhanced spyware protection, new rootkit protection, reduced memory footprint, and new dynamic performance adjustments to keep users productive.

**Network threat protection**—Offers a rules-based firewall engine and Generic Exploit Blocking (GEB) to block malware before it can enter a system.

**Proactive threat protection**—Provides protection against unseen threats (i.e., zero-day threats). Includes Proactive Threat Scan, which does not rely on signatures.

**Single agent and single management console**—The Symantec Endpoint Protection portion of Symantec Endpoint Protection Small Business Edition provides antivirus, antispyware, desktop firewall, IPS, device and application control, and network access control (with the purchase of a Symantec Network Access Control license) on a single agent—all managed by a single management console.

Confidence in a connected world.  ✸ symantec™

**Symantec AntiVirus for Linux and Macintosh—**Symantec AntiVirus for Macintosh and Symantec AntiVirus for Linux remove viruses from email attachments, Internet downloads, and other sources to safeguard the enterprise network.

**Email protection**—Provides protection against email-borne viruses, spam, and security risks in a turnkey package.

**Symantec Endpoint Protection product family**

| | Symantec Endpoint Protection | Symantec Multi-tier Protection Small Business Edition | Symantec Multi-tier Protection |
|---|---|---|---|

\* New additions.

**Note:**
• If a customer does not want to use SEP when they purchase a bundle, they may install SAV. They just need to go directly to Customer Care.
• In the new bundle, SEP version is SEP 11.0.2 (MR2).

## Minimum system requirements

*Endpoint protection*

*Symantec Endpoint Protection Manager, Console, and database*

| Component | 32-bit | 64-bit |
|---|---|---|
| Processor | 1 GHz Intel® Pentium® III | 1 GHz on x64 only with the following processors:<br>▪ Intel Xeon with Intel EM64T support<br>▪ Intel Pentium IV with EM64T support<br>▪ AMD 64-bit Opteron™<br>▪ AMD 64-bit Athlon™<br>**Note:** Itanium is not supported. |
| Operating system | The following operating systems are supported:<br>▪ Windows® 2000 Server/Advanced Server/Datacenter Server/Small Business Server with Service Pack 3 or later<br>▪ Windows XP Professional with Service Pack 1 or later<br>**Note:** Windows XP supports a limited number of concurrent users if the clients are in "push" mode. Use "pull" mode on Windows XP servers for up to 100 clients. | Other requirements | Internet Explorer 6.0 or later<br><br>Terminal Server clients connecting to a computer with antivirus protection have the following additional requirements:<br><br>▪ Microsoft Terminal Server RDP (Remote Desktop Protocol) client<br><br>▪ Citrix® Metaframe® (ICA) client 1.8 or later if using Citrix Metaframe server on Terminal Server | Internet Explorer 6.0 or later |

*Symantec AntiVirus for Linux® client*

• Linux distribution supported:

| Component | 32-bit | 64-bit |
|---|---|---|
| Red Hat® Enterprise Linux 3.x, 4.x, 5.x | X | X |
| SUSE Linux Enterprise (Server/Desktop) 9.x, 10.x | X | X |
| Novell® Open Enterprise Server (OES/OES2) | X | X |
| VMware ESX 2.5.x, 3.x | X | |

Not centrally managed by the Symantec Endpoint Protection Manager

### *Symantec AntiVirus for Macintosh 10.2 Administration Server*

*Operating system requirements:*

• Mac OS X Server 10.4.11–10.5.x

*Hardware requirements:*

• Xserve G5, Xserve, Power Mac G5, Power Mac G4, Macintosh Server G4, Power Macintosh G3 (Blue & White), Macintosh Server G3 (Blue & White), iMac, eMac, or Mac mini computer

• 256 MB of RAM; at least 512 MB of RAM for high-demand servers running multiple services

• Built-in FireWire

• 4 GB of available disk space

*Other software requirements:*

• As an included add-on component, the Symantec Administration Console requires that Macintosh clients with Symantec AntiVirus 10.2 for Macintosh run under Mac OS 10.4.11–10.5.x.

**Note:** Mac OS X Server 10.4.11–10.5.x is required. Mac OS X Server 10.4 and 10.5 software includes Apache and MySQL.

Confidence in a connected world.   symantec.

### Symantec AntiVirus for Macintosh 10.2 Administration Console

#### Supported Administration Console browsers:

• Mac OS X + Safari 1.2.x, Firefox 2

• Mac OS X + Safari 1.2.x, Firefox 2 Windows XP Pro + Internet Explorer 6 SP2, Firefox 2

• Red Hat Linux + Netscape 7

### Symantec AntiVirus for Macintosh Client 10.2

#### Operating system requirements:

• Macintosh OS X version 10.4.11–10.5.x

#### Hardware requirements:

• G3 processor or higher (G4 800 MHz or better if running Mac OS X 10.4.11 or Mac OS X 10.5.x)

• 192 MB of RAM

• 40 MB of available hard disk space for installation

• Internet connection required for LiveUpdate

#### Mail protection

#### Symantec Mail Security for Microsoft Exchange

Server installation system requirements

• Operating systems supported: Windows 2000 Server/ Advanced Server/Data Center (SP4), Windows Server® 2003 Standard/Enterprise/Data Center (SP1), Microsoft Windows Server 2003 or Windows Server 2003 R2, Standard or Enterprise Edition

Console-only installation system requirements

• Operating systems supported: Windows 2000 (SP4), Windows 2003 (SP1), Windows XP (SP1)

Exchange Server 2007

• x64 architecture–based computer with Intel® processor that supports Intel Extended Memory 64 technology (Intel EM64T), or AMD processor that supports the AMD64 platform

• 2 GB of RAM minimum
